

About Us

Codigma, developed by **Magic Byte**, is a powerful tool that helps **UI and frontend developers** speed up their workflow by **generating development-ready UI code** for multiple frameworks. It simplifies the early stages of a project, allowing teams to focus on building great software instead of writing repetitive code.

With **AI-powered code generation, real-time error detection, and automatic optimization**, Codigma accelerates development by up to 40%, ensuring cleaner code with fewer bugs and lower maintenance costs.

Continuously evolving to support more platforms and smarter AI-driven features, **Codigma is here to revolutionize UI development—making it faster, easier, and more efficient.**

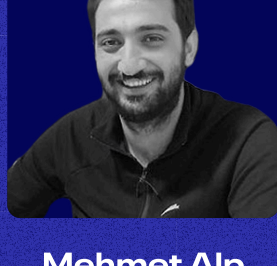

Please do not hesitate to reach out to us at any time with any questions, feedback, or new projects. We are here to serve you better.
